SAGA Global Consultants

Consultancy Services

For LPG Facilities

Feasibility Study

Engineering Design

Project Management

Operation Improvement / Safety Evaluation

Marketing & Distribution

Procurement / Supply of LPG Equipment

FEASIBILITY STUDIES

- Conceptual Studies and Business Plans
- Supply Distribution of LPG
- Market Analysis
- Site Selection
- ◆ Capital Cost Estimation
- Economic Sensitivity Analysis

ENGINEERING DESIGN

- Layout
- LPG Storage
- Piping System
- Electrical System
- Civil Structures
- Automatic Gas Monitoring System
- Vapor Extraction System
- Automatic Fire Fighting System
- On-line Hot Air Sealing System
- Security Access Systems, Alarms, CCTV, Security System

SAGA has the knowledge and experience to carryout design of LPG Facilities, as per international codes & Standards such as API, NFPA, IP, ASTM, BS, IEC, IEEE, and all the other major international standards.

PROJECT MANAGEMENT

- Project Monitoring & Control
- Contract Management
- Construction Management
- Inspection and Expedition
- Health, Safety and Environment
- Commissioning Assistance
- Quality Management

OPERATION IMPROVEMENT/SAFETY EVALUATION

- Formation of Standards/Guidelines
- Bench-marking Performance Parameters
- Operations Audit
- Safety Audit
- Evaluation of HSE
- HAZOP Study/Risk Assessment/Disaster Management Plan
- Health assessment of Existing Facilities
- Accident Investigation
- Training-Functional as well as behavioural

MARKETING & DISTRIBUTION

- Development of LPG Marketing Plan
- Customer Service Standards and Customer Satisfaction Measurement
- Developing Customer Service Network & Compliant redressal system
- Supply & Distribution Chain Management
- Brand Development / Promotion
- Alternative channels of LPG: Reticulated LPG (Piped Gas), Auto LPG

PROCUREMENT / SUPPLY OF LPG EQUIPMENT

- Bulk LPG Storage LPG Bullets, LPG Road Tankers
- LPG Filling Plant Equipments: Pumps, Compressors,
 Filling Machines, conveyors, generators, air compressors,
 ROVs, Valves, Pipelines / Valves, Fire fighting equipment.
- Skid-mounted LPG Filling Plants
- LPG Customer Premises Equipment: Cylinders (Fibre Glass, Mild Steel), Regulators, LPG Gas Stove, Hoses, Safety Caps, Seals, Valves.
- Alternate Uses of LPG: LPG Geysers, LPG Generators, Room Heaters

About Our Experience

SAGA Global Consultants is a Consulting firm, operating internationally and specializing in all aspects of the LPG Industry. SAGA has provided LPG Consultancy service to many countries including India, Nigeria, Kenya, Tanzania, Uganda, Ghana, South Africa, Maldives, Saudi Arabia and Sudan.

SAGA offers services dealing with every aspect of handling and distribution of LPG. The business background of our senior management is in the LPG Industry and we now work extensively globally to raise technical and safety standards whilst responding to the local needs and conditions of the particular marketplace.

Projects to Mention:

Market Assessment, Studies and business plans (Maldives)
